Dear all

Final reminder about the Applied Ecology job candidate seminars tomorrow, Tuesday 28 January, all in Fisher/Haldane, Hamilton building. Please come along as we'd like to have a decent audience and some good questions!

For those of you wanting to meet with candidates, there is an informal gathering arranged for 10 am in CPB coffee room and again at 4 pm.

Schedule of events follows, including talk titles:

10:00: Coffee in Centre for Population Biology (optional)

Seminars:

11-11:30: Imma Oliveras, University of Oxford (Impacts of droughts and fires on tropical ecosystems)

11:30-12:00: Jay Biernaskie, University of Oxford (Growing the field of Darwinian Agriculture)

12:00-12:30: Peter Graystock, Imperial College London (Key microbes for ecosystem services: From emerging diseases to engineering microbiomes)

14:00-14:30: Coline Jaworski, Aix-Marseille University (Ecosystem services in a changing world)

14:30-15: William Pearse, Utah State University (Applied evolutionary ecology)

15-15:30: Johannes Rousk, Lund University (The microbial control of soil biogeochemistry)

16:00: Tea

An interesting line up for sure.

See you tomorrow.

Joe
